# The registry system

**.se**

# Knowledge based on experience

# Bumps in the road

- It is tricky to be the first one
- Getting all on board
  - ISPs
  - Registrars
  - Registrants
  - Name server operators
- Raising awareness and sharing knowledge
- Planning for unforeseen events

**.se**

# Lessons learned

- Do not charge extra for DNSSEC
- Make DNSSEC easier to use
  - OpenDNSSEC now used by e.g. ICANN and 9 TLDs
- Handle your keys with care
  - Choose your HSM with care
  - Will soon publish “A Review of Hardware Security Modules”
- Try to activate your local Internet community
- Start with a test bed now
